

## Seavus Project Evolution

Achieve improved project performance through collaboration.

---

# Customers in the Energy/Oil and Gas/Mineral Industry

## Energy/Oil and Gas/Mineral

The entire lifecycle of energy and mineral production and distribution demands constant supervision, from ensuring safe and reliable equipment, to delivering product and serving customers. These activities require continuous communications across the supply chain. **Seavus Project Viewer** enables both internal and external groups and teams to seamlessly communicate information relative to these ongoing projects.
